

Step 1:

public class Xe

{

private String xoxe;

private String chuxe;

private String kicuxe;

private String mouxex;

private int durgxich;

public <sup>float</sup> ~~void~~ doryxhne() {

Step 2:  
public class NhanVien

private String ten;  
private String ngaysinh;  
private String gioitinh;  
private float luong;  
public void nhap() {

public void xem() {

}  
  
public class SinhVien {

private String ten;  
private String ngaysinh;  
private String gioitinh;  
private String lop;  
public void nhap() {

```
}  
public void xern () {  
}  
}
```
